

The Future

Which professions do you think are "AI-proof"? Why is the "human touch" still necessary in these fields?

With AI able to translate any language perfectly in real-time, is there still a point in learning a second language? (For example if you had a tiny earbud that translated your language into English perfectly would you stop learning English?)

In the future, do you think AI will make us lazier or more productive?

Phrases for expressing opinion:

What are your views on AI?

I have strong views on....

I don't have a strong view on....

I feel that.....

I reckon that... (more informal)

I doubt that it will have a big impact (I don't think it will have a big impact)

I'm not so well informed on that subject (I don't have so much information/ I don't know about it)
